WORK EXPERIENCE

Front-end Developer
Swiver

06/2022 - 04/2023   *Tunis, Centre Urbain Nord*

Swiver is an online invoicing and business management software intended for professional craftsmen, VSEs, and certain SMEs and which aims to simplify invoicing and accounting procedures.

Achievements/Tasks
- Create components for Swiver.io software that are responsive for web desktop and mobile
- Use my understanding in React JS and Typescript fundamentals to implement logics for components
- Work on the translation in Arabic, English and French

SKILLS

React JS   TypeScript   JavaScript   Git   bootstrap

Linux   Translation   Canva   C   C++   php

SQL   English-Arabic Translation

PROJECTS

A video game "The motherland" (11/2021 - 02/2022)
- **A collaborative project of the 1st year** that i was part of, and contributed in writing the code in C alongside SDL library with my team.We used Github and Git functionalities, along with designing the game using different Adobe softwares, and putting together the different components of Joystick using Arduino hardwares and softwares.

Blogs website (07/2021 - 09/2021)
- **A personal project** imitating the famous website "Blogger" that i worked on using HTML, CSS and JS alongside with bootstrap.

Portfolio (07/2022 - 08/2022)
- **A personal portfolio project** that is actually a responsive React app that consists of four pages (Home, About, Contact and Portfolio)**,** I used my knowledge in React JS + TypeScript to create it.

"WASHA" Website (09/2022 - 12/2022)
- **A collaborative project of the 2nd year** that I worked on with my colleagues, and contributed in writing code for creating different UIs using HTML+Bootstrap, implementing CRUDs for the entities using php and creating and managing the database using Oracle. We used Github and Git functionalities for keeping our work consistent.
