OBJECTIVE

Final-year Computer Science Engineering student specializing in Data Science, seeking a 6-month End-of-Studies Internship (PFE) in Data Science, Data Engineering, or MLOps. Project-proven experience architecting production-oriented platforms that bridge backend APIs and predictive analytics.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Java, R
Data & ML	Pandas, NumPy, scikit-learn, statsmodels (ETS, ARIMA/SARIMA), MLflow
Backend & Databases	Fastify, Node.js, Express, REST APIs, JWT/RBAC · PostgreSQL, MongoDB, Neo4j, schema design, migrations
DevOps & MLOps	Docker, docker-compose, CI/CD pipelines, experiment tracking, Linux, Git/GitHub
BI & Frontend	Metabase, Power BI, Plotly, Seaborn/Matplotlib · React, Next.js, Tailwind CSS

PROJECTS

ResearchBridge — Research Intelligence Platform

Solo Developer

- Shipped, solo, a platform that turns a research idea or uploaded paper into an evidence-grounded assessment: related work, novelty, research gap, applications, feasibility.
- Architected the pipeline — ingestion from arXiv, Semantic Scholar and PubMed; PostgreSQL + pgvector retrieval; LLM knowledge extraction and gap detection — with every claim tied to cited evidence.
- Built for reliability: categorical (non-fabricated) confidence scoring, logged ingestion failures, and a Dockerized stack with LLM providers behind a replaceable interface.

Python · PostgreSQL/pgvector · LLM APIs · Docker

Estate-Mind — Tunisian Real Estate Pipeline & EDA

Data Analyst

- Built a reproducible pipeline and analysis notebooks yielding market insights — price distribution by region, listing activity, rental/sale split, spatial views — and clustered listings into reporting-ready segments.

Python · Pandas · Seaborn · Matplotlib · Plotly

MLOps Pipeline & Full-Stack Web Application

End-to-end ML pipeline — reproducible training and evaluation, MLflow tracking, Dockerized services — with a type-safe Fastify + Next.js app on PostgreSQL and JWT authentication.

PROFESSIONAL EXPERIENCE

Next.js Developer Intern — iTransform365

May – Aug 2024

- Built and optimized Next.js components for performance and scalability, with responsive interfaces in TypeScript and Tailwind CSS.
- Integrated PostgreSQL services alongside backend engineers and shipped production-ready features.

React.js Developer — Swiver

Aug 2022 – Apr 2023

- Developed responsive React.js and TypeScript UI components with multilingual support across Arabic, English and French, following a React.js internship at Swiver (Jun – Aug 2022) on responsiveness and accessibility.

EDUCATION

Engineering Degree in Computer Science — Data Science — ESPRIT, Tunis

2021 – 2027 (expected)

Fifth and final year. Focus: Data Science, Databases, Machine Learning, Software Engineering, Systems Design.

Certifications	CCNA: Switching, Routing & Wireless Essentials (Cisco) · MongoDB Certified Node.js Developer · Neo4j Fundamentals
----------------	---

Languages	Arabic — native · English — fluent · French — basic
